

## **Pathology Voice Mailbox**

There are now two ways to relay clinical information to the pathologists:

1. **Voice Mailbox:**

You may dial 494-1424 and leave a brief message 24 hours a day. The Pathology transcriptionists will forward the clinical information to the appropriate pathologist handling the case.

2. **Order Comment/Specimen Collection Comment Field in Ulticare:**

At the time of order entry or specimen collection in Ulticare, clinical information may be entered as free text in either the comment field or the collection comment field. This clinical information will appear on the pathologist's worksheet.
